Mit LumiTap Verbinden

Für Spiele-**Verwaltung** und **Live-Ansicht** kannst Du beliebige Geräte per **WLAN** (LumiTap AA:BB:CC:XX:YY:ZZ) mit Deinem LumiTap verbinden. Die LumiTap **Web-App** ist dann unter **http://lumitap.local** mit jedem Webbrowser erreichbar.

WLAN **Zugangsdaten**: beide ◀▶ Tasten gedrückt halten.

Spielanleitung

Geräteverwaltung: Externes WLAN einrichten

The first screenshot shows the LumiTap home screen with a 'Geräte Verwaltung' button. The second shows a login screen with 'device' as the username. The third shows the 'Externes WLAN' setup screen with 'GimmiSys' as the SSID. The fourth shows the connection status as 'Verbunden'.

Mit LumiTap verbinden

Benutzername: device

Zugangsdaten eingeben, Verbinden

LumiTap verbindet zum externen WLAN

Geräteverwaltung: LumiTap updaten

The sequence starts with the 'Externes WLAN' setup screen. It then moves to the 'Software Updates' screen where the user scrolls to find updates. The next steps show the user selecting an update, confirming the installation, and waiting for the update to complete. The final steps show the user logging back in after a restart and confirming the update was installed.

Externes WLAN einrichten.

Herunterscrollen zu verfügbaren Updates.

LumiTap Update bestätigen.

Update Installation abwarten.

LumiTap startet automatisch neu.

Nach Neustart: ggf. neu anmelden.

Update wurde installiert.
